

50 AMP Smart Energy Management System™ Model 700

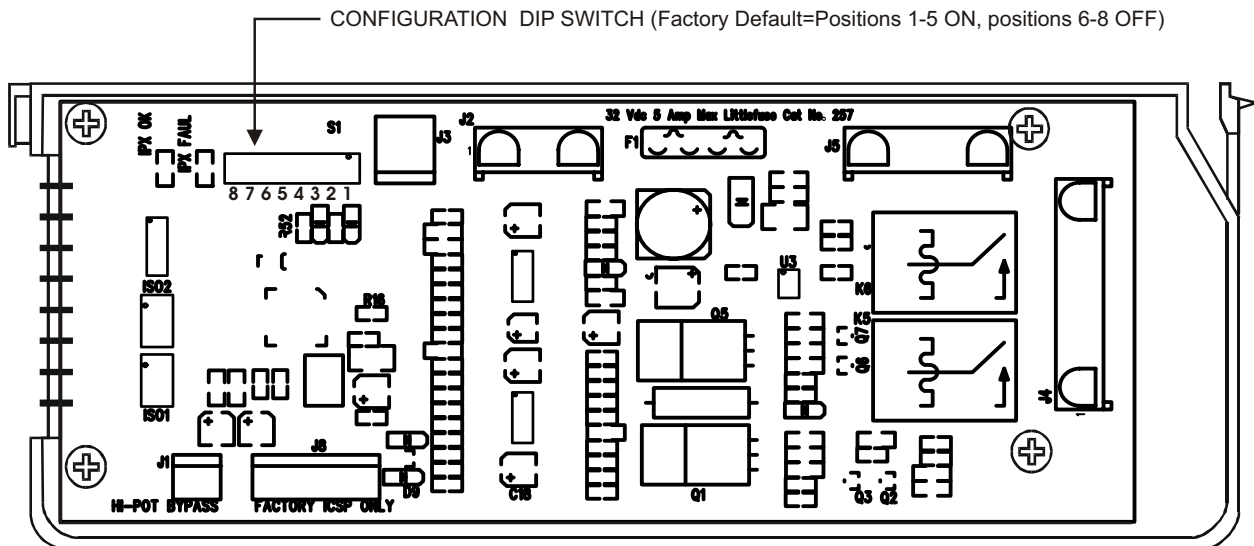

INSTALLATION & SERVICE MANUAL

ERRATA

DIP SWITCH S1 SETTINGS:

The Installation and Service Manual for the Smart EMS System states that all of the switches on Dip Switch S1 will be shipped from the factory in the ON position. On initial units the switches in position 6, 7, and 8 will be in the OFF position as shipped from the factory and must remain in the OFF position independent of the state of the switch settings in positions 1-5 until further notice.

Please refer to the figure below for switch position locations.
